GRIDPRINT analysis report

Verdict

?

INCONCLUSIVE

The analysis could not reach a result. This alone does not mean the video is fake.

Report state: FINAL

Summary

Estimated recording start (UTC)	Not determined
Grid zone	Not determined
Reasons	• `USER_INPUT_REQUESTED` — The analysis asked the user for more information.

Key plots

Limitations

- GRIDPRINT reads the grid frequency from the flicker of mains-powered lights. It is not a deepfake classifier and it is not cryptographic proof.
- A missing signal is never evidence that a video is fake. Many phones hide the flicker ("anti-banding"), and daylight or battery lights do not flicker.
- A time estimate is possible only inside the time range of the reference log for the zone.
- Location output is limited to the grid zone. GRIDPRINT gives no finer location.

- Thresholds come from calibration data. Results outside the calibrated conditions carry more risk of error.
- A CONTRADICTED verdict needs approval by a human reviewer before the report is final.
